# SMW & STW WIRE ROPE HOIST FEATURES

## Precision Lift Gear Box

The gear box is a three stage oil bath, precision geared, and sealed with cast-aluminum covers designed for great heat dissipation and easy maintenance.

## Load Cell with LED Display

All SMW & STW models come standard with a load cell on the wire rope dead end connection that displays live load weight at all times. The 3" display lets the operator know at a glance how many pounds the system is carrying. This adds safety for the operator, longevity of the hoist, and provides the ability to calculate load weights for freight companies.

## Wire Rope Drum Guide

The rope drum is deeply grooved with high quality seamless steel tube and a high tensile rope guide for optimum line arrangement, greater safety factor, and longer life.

## Efficient Lifting Motor

Hoists feature a heavy duty lifting motor designed for long component life and ease of routine service.

## Travel Limit Control

For additional safety, this hoist comes standard with built in travel limit controls for both up and down travel operation.

### 3 & 5 Ton Hoist Panel

High quality NEMA 35 control panel. Includes phase protection, motor overheating protection, as well as transformer circuit fuse protection. Includes Danfoss VLT Microdrive to control trolley travel speed allowing adjustable smooth ramp-up options.

**VFD TECHNOLOGY**  
FEATURING  
**DANFOSS DRIVES**

- VFD Controlled Lift
- VFD Controlled Trolley Motion
- Improves Load Control
- Infinitely Adjustable Ramp Up & Down Control of Lift and Trolley Motion

### HD Hook Block

Robust all-metal lower hook assembly designed for many years of operation even in tough environments. Includes easy to remove covers for maintenance and wire rope replacement. The Hook is designed to freely swivel 360 degrees for convenient load attachment.

### Optional Pendant Control

Quality 2-Speed pendant control with E-Stop. Select 2-Motion for monorail applications and 3-Motion when the hoist is paired with a bridge crane.

## Enclosed 65 Amp Conductor Rail

These components are not typically in stock, but are custom designed and produced for complex loop monorail systems that include horizontal turns.

- Typical lead time is 10-12 weeks after drawing approval by distributor and/or end use customer.
- All above components are 4 conductor, 65 Amps, and designed for environments between 0-155°F.
- In order to complete a 90° turn with one turn section above, we recommend the use of a 6 ft (72") radius if possible.
- Installer is responsible to cut rail to exact lengths at job-site and bend/punch copper conductors at the appointed location to fit system.
- Not advised to be in direct sunlight or plastic will break down over a period of time. MFG advises heat/weather shield.

- All kits include LED or LASER device(s), mounting brackets, reflector(s) on mounting bracket, control cable(s), and any required relay controls.
- An “Event” is simply a measurable action that can dictate the speed or the stopping of the moving crane. A single laser may have dual events, but can still only point in one direction, which may require a “Twin” system if there are functions to be controlled in both directions
